

Respondent Consent Agreement

All respondents must be at least 18 years old.

This survey will take some time. You may take it now or any time before Monday, July 27th.

There is no reward or compensation for taking this survey.

All responses are completely anonymous. I will not collect or ask you to provide any personally identifiable information, though you have the option to skip any questions you are not comfortable responding to. I am not responsible for and do not have access to any data Google may collect for the use of Google-owned products such as Google Forms.

Participating in this survey is completely voluntary. Even if you start the survey, you are not required to submit and may stop at any point before submitting. Because responses are completely anonymous and are not traceable to respondents, your response cannot be edited or deleted after you have submitted it. Aside from the respondent consent agreement, all individual questions are completely optional and may be skipped for any reason.

Please do not submit more than one response per person.

The following questionnaire contains potentially disturbing content, including both implicit and explicit references to sex, sexual violence, and anti-gay and anti-transgender sentiments.

As per course policy, I will make all responses publicly available for data analysis. Once again, all responses are anonymous, and I will publish no personally identifiable information.

Please select "Agree" below if and only if you understand and consent to all of the above.

Used in Survey

Furry Agreeability Scale

self-written

Please answer the questions in this section according to the following scale:

- 1 - Strongly agree
- 2 - Agree
- 3 - Neither agree nor disagree
- 4 - Disagree
- 5 - Strongly disagree

If you don't understand a question or the terms it uses (e.g. "furry," "furries"), please skip that question.

Annotations in bold represent how a question is factored into furry unfavorability. “+” marks a question that should be scored normally. “-” marks a question for which a high agreement score shows positive favorability, and thus are reverse scored. “0” marks a red herring question not used in evaluating furry unfavorability, but which may be useful for other purposes.

1. I am familiar with the furry fandom and could confidently define what a furry is. **0**
2. Furries wear animal costumes because of a sexual fetish. **0**
3. Furries wear animal costumes because they believe they are not human. **0**

Removed from Survey

Very close to the release of my survey, I'm making a hard pivot and cutting the below survey questions in favor of scoring homophobia and transphobia on my own written scales. I originally thought it would be more professional to derive survey questions from existing homophobia/transphobia assessments. However, I realized that these scales are scoring for

explicitly hateful attitudes and even violent tendencies. In the locations I will be conducting my survey, I already expect to see highly left-leaning and LGBTQ+-favoring samples. I think asking the below questions will produce homophobia and transphobia distributions that could very well be entirely in the furthest one or two (of five) categories on my ordinal scales, which will not be helpful for data analysis. Furthermore, if I wanted to intentionally seek out survey respondents who are likely to score highly in transphobia and homophobia for a more balanced sample, as a solo researcher (and a small, female, queer person), I would at worst be actively putting myself in danger. However, some of the questions above are maintained from the original questionnaire, and credit still must go to the source.
